1. This Office action is responsive to the RCE filed 12/20/2006 and tel. Interview with Mr. Clark Jablon on 01/17/2007. A signed copy (1) of PTO-form 1449 is attached to this Office action. If any copies are missing please notify the examiner in response to this action.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Clark Jablon on January 17, 2007.

The application has been amended as follows:

Cancel claim 6.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 3 and 7, drawn to a switching circuit for replacing defective data in a plural memory architecture, classified in class 365, subclass 200.
- II. Claim 6, drawn to a defective bit replacement device, classified in class 365, subclass 200.

The inventions are distinct, each from the other because:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II has separate utility such as in a smaller single bank memory device. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant elected Group I claims without traverse.
